Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

1. Claims 48 – 105 and 113 – 135 are drawn to a system geared towards electronic shopping classified in class 705, subclass 26.
2. Claims 106 – 112 are drawn to a generic system for web hosting classified in 707, subclass 10.

The inventions are distinct, each from the other because of the following reasons. Invention 1 and invention 2 are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention 1 is a system which is communicatively linked to remote computers of shoppers, whereas, invention 2 is a generic system for web hosting which can be used for purposes other than shopping and services. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3629

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
